6R

In maths this term we have been investigating place value and using Maths-online to assist us in this process. More recently, we have revised addition and subtraction strategies, including the split strategy, bridging to the decade and compensation. We are using the Think Mentals series to show how to use clever strategies to break tricky maths problems into friendly, manageable chunks. We provide lots of opportunities for students to demonstrate their understanding and share their knowledge with each other which is a great way to learn. Each student has a password for Maths online, so they can access this at home on their own computers.

Clean Up Australia Day

A huge thank you to all students that participated in our Schools Clean Up Day (SCUD) event this year. Your efforts have been extremely appreciated by the team at Clean Up Australia.

The positive impact that you have made to the environment, but also to the livelihoods of our pupils through participation is something which you should be commended for.

Also, thanks to Shakiyla Saunders for organising and completing our [End of Clean Up Report](#), then sending it through! This information really helps Clean Up Australia Day understand how waste plays a massive role in all of our lives and can help them evaluate what needs to be done to promote a healthier environment.

THANK YOU!

Mrs Raymond
